Complete Coverage

ERP5 covers accounting, customer relationship management, trade, warehouse management, shipping, invoicing, human resource management, product design, production and project management.

Customisable Workflows Everywhere

All ERP5 business processes are implemented based on Zope transactional Workflows. Workflows directly describe the business process of the customer. ERP5 workflows can be customised through the Web and extended to fit each customer specific needs.

Variations Everywhere

All resources in ERP5 can be variated in any number of dimensions, providing built-in configuration for products and reduced design cost for bill of materials (BOM) and bill of operations (BOO) as well as structured rule-based approaches to complex pricing.
